

Vento

The voice-first operating system for Latin America's small businesses.

Sell, verify payments, run inventory and talk to your business — from the phone you already own.

LIVE · WEB + ANDROID

MADE IN COLOMBIA

Run on paper. Paid by screenshot.

2.3M

micro-businesses in
Colombia's 24 main cities
alone.

Bars, restaurants, corner stores,
salons and workshops — most
without a real system.

Tabs on paper

Orders get lost, mis-charged or forgotten when the place fills up.

Fake payment screenshots

Transfers are “confirmed” by looking at a screenshot that anyone can edit.

Inventory by eye

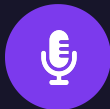

Best sellers run out mid-shift; supplier invoices are typed by hand.

Five apps, no system

POS, notebook, calculator, WhatsApp and spreadsheets that never talk.

One app. It listens, sells and verifies.

Talk to it

"Hola Vento, table 3, two beers."
Hands-free orders, payments and questions.

Verified payments

Detects fake transfer screenshots and SMS. Zero fees from Vento.

Vento AI

Reads supplier invoices, answers with real numbers, predicts stock-outs.

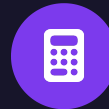

QR ordering

Guests order from their table; it lands in the tab and the kitchen.

Music on the TV

Guests request songs by QR; they play on the venue's TV, fairly queued.

Pocket accountant

Cash close, real profit, VAT and Excel exports for the accountant.

Hands-free: just say “Hola Vento”

“Hola Vento, table 3, two Póker.”

✓ **2 Póker added to Table 3**

Stays attentive after each command — no need to repeat the wake word.

“Undo the last order”

Reverts instantly.

“Table 3 pays 20 thousand”

Logs a partial payment, says what's left.

“Juan owes me 20 thousand”

Goes to the credit notebook, dated.

“How many Póker are left?”

Answers from live inventory.

“How much did I sell today?”

Answers out loud with real data.

No fake screenshots. No fees.

1. Show your QR

The business's Nequi / Bre-B QR prints on the tab and receipt.

2. Customer pays

From Nequi, DaviPlata or any Bre-B bank app.

3. Vento confirms

The bank's own notification reaches Vento: amount, sender and which table.

Every screenshot is read on-device and cross-checked against money that actually arrived:

- | | | |
|--|--|---|
| Matches a real deposit
Same amount & time → accept | Reference already used
Same receipt shown twice → fake | Paid to another number
Money never reached you → fake |
| Future or old date
Edited screenshot → flagged | Not arrived yet
Don't hand over → alert on arrival | SMS from a phone number
Banks don't text from phones → fake |

An AI that knows the business

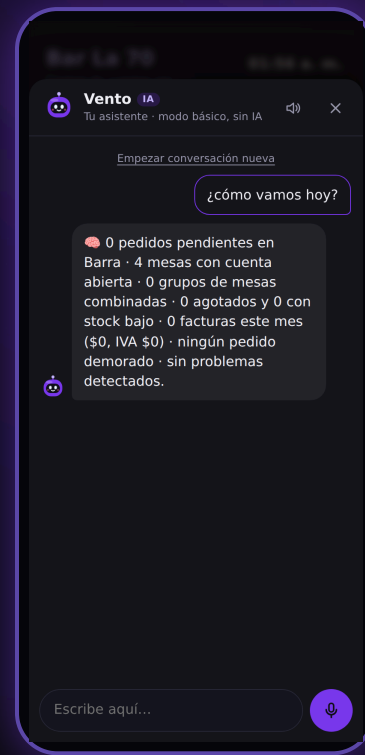

2.4 s

to read a supplier invoice on-device, no internet (internal test)

Dual-engine

on-device and cloud readers race; the fastest result wins

- Scans invoices → stock, VAT and true unit cost, automatically
- Answers “what did I sell today?” with the business’s real data
- Flags stock-outs, price increases and delayed orders; predicts how long stock lasts
- Pre-configured: the business never handles an API key

Five apps, replaced by one

Voice orders in Colombian Spanish

Fake-payment detection

AI invoice reading, even offline

Tables, split bills, partial payments

Credit notebook (fiados) by voice

Inventory with alerts & forecasting

QR menu & table ordering

Guest music queue on the TV

Kitchen / bar display

Waiter app, roles & permissions

Cash close, profit, VAT, Excel

Delivery, tips, receipts with tax ID

Barcode selling & quick sale

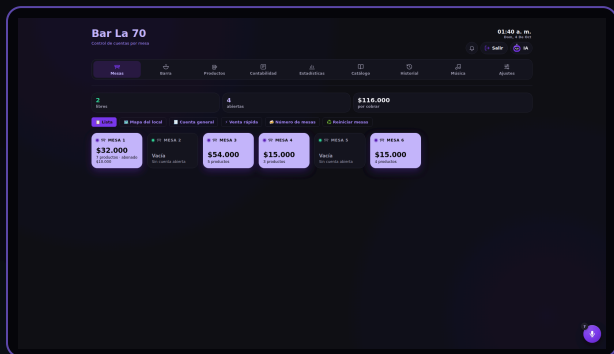

Floor map, merge & split tables

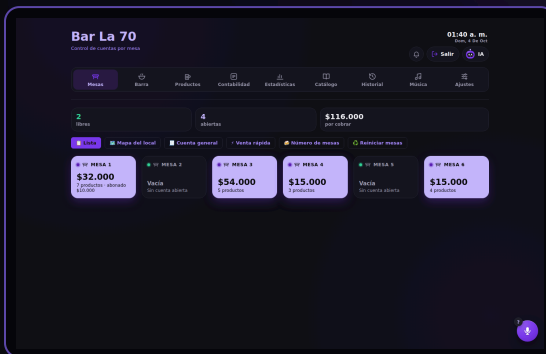

Multi-device, multi-branch, cloud backup

NO HARDWARE TO BUY

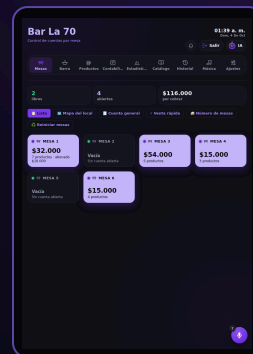

Runs on any screen they already own

Smart TV / TV box

Laptop / PC

Tablet

Phone

Works offline

Keeps selling without signal;
syncs later.

Real-time sync

Waiter's phone → register →
kitchen.

Nothing to install

Browser or Android app.

Instant payments just went national

Oct 2025

Bre-B goes live

Colombia's central bank launches free, 24/7 instant transfers across 227 financial institutions.

25M

Nequi users

Mid-2025: one digital wallet alone reaches over 25 million Colombians.

Any phone

On-device AI & voice

Speech recognition and OCR now run on the Android phones businesses already carry.

Start in Colombia. Built for LatAm.

Beachhead

2.3 million micro-businesses in Colombia's 24 main cities (DANE 2024) — bars, restaurants, stores, salons, workshops.

Built to expand

75+ business templates already in the product: the same voice, AI and payments engine adapts its vocabulary to tables, rooms, chairs or work orders.

Next markets

Countries with real-time payment rails and wallet adoption, where screenshot fraud is the same problem.

Simple SaaS. No cut of the money.

Free trial

All features, no card. The business sees value on night one.

Monthly subscription

Priced by business size: more devices, branches and AI included.

Lifetime licenses

One-time option for owners who prefer to buy, not rent.

0% transaction fees from Vento. Payments go straight to the merchant's own Nequi, DaviPlata or Bre-B account — Vento only verifies them. Licenses and plans are managed from the Vento Admin console.

A category of one

	Paper + WhatsApp	Traditional POS	Payment gateways	Vento
Hands-free voice operation	—	—	—	✓
Fake-screenshot & SMS detection	—	—	—	✓
No fee on each sale	✓	✓	—	✓
No dedicated hardware	✓	—	✓	✓
AI invoices & inventory	—	—	—	✓
Works offline	✓	✓	—	✓

Typical characteristics of each category; individual products vary.

From app to the voice of every counter

LIVE

- Voice & “Hola Vento”
- Verified payments
- Vento AI · QR · TV music
- Android + web + admin console

NEXT

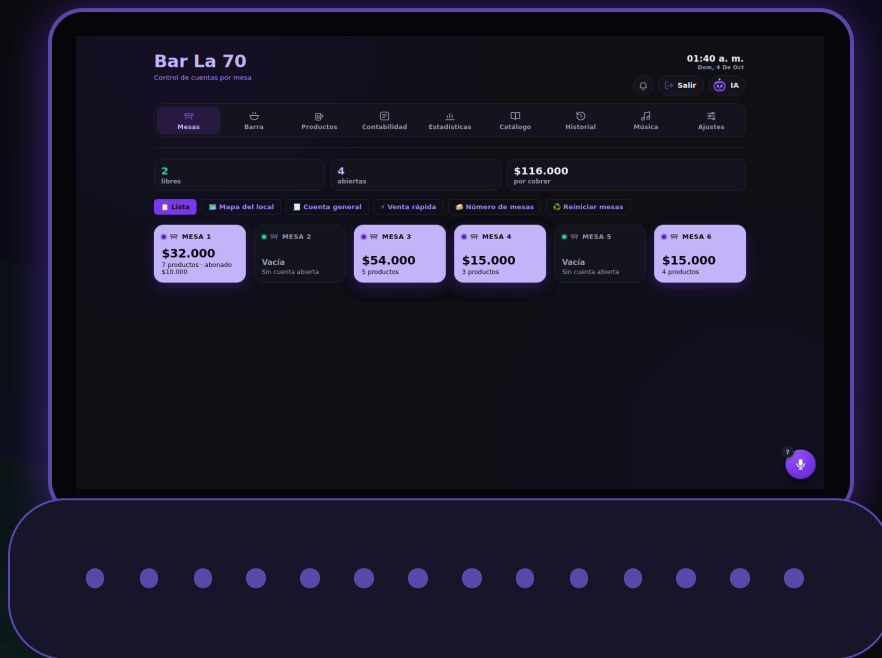

- E-invoicing (DIAN)
- Pay at the table from the QR
- Easy mode for older owners
- Loyalty & bookings

VISION

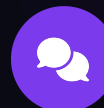

- Vento with a screen: a dedicated voice device for the counter
- Every sector: salons, hotels, workshops, events
- LatAm expansion

Vento with a screen

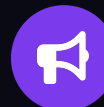

Always on at the counter

A dedicated Vento device — no phone needed.

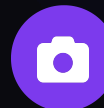

You talk, it shows

See the tab, the order or the total while it answers.

Announces orders

“New order from table 5,” out loud.

Built-in camera

Reads invoices, barcodes and payment receipts.

A real product, shipping every week

v1.28

Current release

Web app, Android app and Vento Admin console.

75+

Business templates

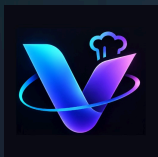

Same engine, local vocabulary for each type of business.

15

Core modules live

From voice orders to payment verification and AI.

Next: paid pilots with bars and restaurants in Colombia, then scale the payment-verification engine to every business type.

Vento works for you.

Let's build the voice of Latin America's small businesses.
